Contents

Preface of the series editors **5**

Preface of the author **11**

Introduction **13**

Theories of social inequality **17**

Empirical approach to social inequality **25**

Methods **29**

Differences in the values of grave goods and burial pit sizes 29
Bioanthropological data 32
Stable isotope analyses 32
Pathologies 33
Spatial analyses 34
Statistical procedure 34
Source critique 36

Schwetzingen (Early Neolithic, 5200-5000 BCE) **39**
Spatial analysis 41
Values of grave goods 43
Burial pit sizes 46
Values of grave goods and burial pit sizes 48
Lorenz curves and Gini indices 53
Distance to the next burial 53
Diet and status 57
Body height 60
Hierarchy, heterogeneity and transformation 60
Summary 66

Lauda-Königshofen (Final Neolithic, 2600-2500 BCE) **71**
Spatial analysis 72
Values of grave goods 75
Burial pit sizes 78
Values of grave goods and burial pit sizes 82
Lorenz curves and Gini indices 87
Distance to the next burial 87
Diet, growth and status: Nitrogen ($\delta^{15}N$) 89
Hierarchy, heterogeneity and transformation 93
Summary 99

Singen at Hohentwiel (Early Bronze Age, 2200-1900 BCE) **103**
Spatial analysis 105
Values of grave goods 105
Burial pit sizes 108
Values of grave goods and burial pit sizes 113
Lorenz curves and Gini indices 115
Distance to the next burial 115
Diet, growth and status: Nitrogen ($\delta^{15}N$) 117
Heterogeneity and transformation 120
Strontium isotope analysis 123
Summary 127

Magdalenenbergle, Villingen (Early Iron Age, 620-550 BCE) **133**
Spatial analysis 135
Values of grave goods 138
Burial pit sizes 141
Values of grave goods and burial pit sizes 142
Lorenz curves and Gini indices 147
Distance to the central burial 148
Diet and social position: Nitrogen isotope analysis ($\delta^{15}N$) 151
Tooth decay 162
Strontium/oxygen isotope analysis 162
Summary 172

Horb-Altheim (Early Medieval period, 450-510 CE) **175**
Spatial analysis 177
Values of grave goods 180
Burial pit sizes 187
Lorenz curves and Gini indices 188
Values of grave goods and burial pit sizes 189
Distance to the next burial 191
Growth and body height 196
Pathologies 198
Heterogeneity and transformation 199
Summary 204

Synthesis **209**

Conclusions **221**

References **223**
